The Lindner Shoe Factory.

Business for 1901 Expected to Reach one Million of Dollars.

Mr. John Lindner, the founder and president of the Lindner Shoe company, left to-day on an extended business trip to Philadelphia, New York, Providence, Boston and other points on route.

In a brief interview he stated to a VOLUNTEER representative that the business of the factory is growing quite rapidly. Last year's business amounted to \$600,000 and that for 1901 is conservatively predicted to reach \$1,000,000.

At present there are 500 employees on the pay roll and more are being solicited owing to the greatly increased orders. During recent years the factory has grown to be a mammoth industrial plant and it bids fair to undergo more enlargement before many months roll by. The Lindner shoe is known all over the United States and its reputation for first class workmanship is firmly established.

Terrible sores would break out on her head and face, and the best doctors could give no help; but her cure is complete and her health is excellent." This shows what thousands have proved, that Electric Bitters is the best blood purifier known. It's the supreme remedy for sores, sores, salt rheum, sties, boils, and running sores. It cures all liver, kidney and bowels, expels poisons, helps digestion, builds up the strength. Only 50 cents. Sold by W. F. Horn, Druggist. Guaranteed.

A GAVE DISCOVERED.

Beautiful specimens of Calcite Found Two Miles From Town.

Several days ago in making a deep cut about two miles south of town for the Holly trolley, a large deposit of a superior grade of calcite was discovered. A VOLUNTEER representative inspected the find and predicted a cave in the immediate vicinity. On the following day two blasts verified the prediction, an immense fissure being discovered. The entrance is by a perpendicular opening about 20 feet in depth. From the bottom the fissure extends from south-west to north-east for some distance. Unfortunately the fissure is too narrow at some points to admit a man's body and the true length of the opening is not yet known. There was an abundance of beautiful strobilitic and stalagmitic formations ranging from yellow to pure white. Several hundred pounds of nature's handiwork were removed by many persons who visited the place. The country round about is full of sink holes, so called, and it is possible that they connect with the new cave.

Mr. Patrick Ross, of Harrisburg, projector of the trolley line, ordered his men not to fill up the entrance until an investigation could be made. Dr. W. E. Horn pronounces the calcite found as the finest he has ever seen. Should another opening of larger dimensions be discovered, it is quite probable that the trolley people would fit it up for visitors.

Another natural curiosity is located near the new cave in the form of an elm and an oak tree which have grown together a short distance out of the ground.

Improvement Notes.
A new front is being placed in the Esominger store room, East Pomfret St.

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the constitution strength by building up the constitution and sensitive nature in doing its work. The proprietors have so much faith in its curative powers, that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address: F. J. Letter From Illinois.

What a Cumberland County Woman sees in the West

EXCELLENT FISHING FOR DAVY W. W. Mt. Sterling, Ill. Dec. 25th, 1900.

DEAR VOLUNTEER:
I find that Christmas is celebrated here just as it is in Cumberland county. So there is nothing startling to report in that respect. People give each other gifts, ask each other to log dinners, some because love and affection prompt and others because they must go with the current.

It seems to me that criticisms on the West are out of order when I read of a hold-up between Mechanicsburg and Shepherdstown two murders in Cumberland county within a year, and a fair list of devices embellishing the legal column of the paper. And it won't do to talk of the good old times either, for the first man ever born killed his brother.

It is interesting to follow the history of Illinois. The word is said to mean 'men', some say 'superior men'. In 1779 the famous Land Laws of Virginia were passed confirming all grants made to settlers and providing for selling the balance of public land at 40 cent per acre! The same old story of greed for gold is related with the accompanying disappointment though the land of parent quality was found and it was believed that if one were to dig deep enough at Mexico, gold would be found under the lead.

In the compact of 1787 these words of gold occur: "Religion, morality and knowledge being necessary to good government, schools and means of education shall always be maintained." In the southern end of the state slavery existed among the old frontier settlers and was hard to eradicate and slaves did not disappear from the census of the state until 1850.

The Drainage Canal which cost \$54,000,000 and was finished last year caused a great deal of opposition because it emptied the overflow of Chicago into the Illinois river which is said to abound in fish, but it is hoped the carp, cat and eels will do their duty and keep the water pure. From what I have heard about the catches of fish in the Illinois river, I am sure our old friend, D. W. W. with a supply of Lunatic hooks and the right kind of bait could enjoy himself very well in Illinois.

(CONTINUED TO-MORROW.)

Columbia Calendar for 1901.
The 1901 edition of the Columbia desk calendar has made its appearance. This unique and useful compilation has been issued annually for the last sixteen years and has come to be regarded as an indispensable article in many business offices and homes. The new edition preserves the leading characteristics of its predecessors but shows marked improvement as regards presswork and binding. It is a preliminary note the publishers state that from time to time they have been urged to change the general character of the calendar—to make it a comic calendar, or more historical, or astronomical or otherwise different, but they have always thought it best to retain the old-time form with the contents subordinate to the original thought and individual judgment of the contributors who send in the material for the page heads. The calendar is being distributed by the American Bicycle Co., Columbia Sales Department, Hartford, Conn. It will be sent to any address for five-cent stamps.
