Indian Industrial School,

Carlisle, Pa., Feb. 19th 1885

My dear friend -

My views of what is needed to forward Indⁿ civilization are so radical, and would need such strong determination to carry them out, that I halt in the formulation of them and ask myself if it would not be better to wait and see what manner of Secretary and Com^r of Indⁿ Affs we have.

I am more than half inclined to go south next

week and remain a
fortnight, taking in the
Exposition and the Inter-
national Convention of
Educators 23rd to 28th at
N.O. then across the
gulf to the Calosahatchie
and Everglades then up
through Lake Okechobee
and central Florida to
San Augustine for a few
days, thence home.

I think if you could go
along it would decide
me at once. Mrs. P
dont want to go, and I
am glad to leave her so
as to lessen the expense, and
give more freedom for getting

around. We ought to start
Tuesday or not later than
Wednesday, if we go.

Yours most cordially

R. M. Pratt
