

Indian Industrial School,

Carlisle, Pa.,

January 2nd 1886

My dear friend.

Enclosed I return

Hallocks letter. He has written me twice after the same fashion.

He has a tract of land such as he describes which he would like an appropriation from the Govt to improve. If he were concerned for those who had not been to the schools, I wd say let him go ahead. He wd only prove his scheme a failure, and confirm our work; but as he proposes to segregate our pupils and continue the very principles which stands in the

Dr. C. R. Agnew

way, and has always stood in the way, I cannot favor it. We are fighting our way into American life and civilization, and four out of five of our pupils have got in and have the capacity to stay where they leave us, and in my judgement a purgatorial place is not only not required, but is a stumbling block of a serious nature. This scientific, high toned, concerned agitation of the when and how of letting the Indians in, and what qualifications they shall have has, so far as I can see, other than Indian welfare as its motor. There are plenty of other western schemers at work to the same end, and they are a plausible lot.

Thank for your good wishes. We are most cordially reciprocating.
Faithfully yours, R. H. Pratt
