Dear Sir.

I ask attention to
my letter just written asking
to return five pupils, and hope
the request for telegraph authority
may be granted. Dr Ewen thinks
two or three more days would place
Manuelito's son beyond advisable
travel, while he may go if he
starts at once.

Bother the Navajoes as

well as the crows are full of
syphilitic poison either
hereditary or acquired. I

shall be just as well
satisfied if the ^{balance of the} Crow party
fails to come. Four out
of the eight who did come
are all incubes, as I
wrote, on their arrival.

Respectfully
R. H. Platt
