July 6th, 1891.

The Honorable,

Commr. of Indian Affairs,

Washington, D. C.

Sir:

It becomes necessary to make some addition to our hospital accommodations. During the past winter our sick were crowded into such space as made it greatly detrimental to them. We practically take care of the sick of 800 people, and have found it best, in most cases, to remove from the quarters those who are at all materially ill. During the epidemic of measles, and the pneumonia following, we had more than a hospital full. I propose to make a plain addition of a wing to the north-west corner of the present hospital, as per the enclosed plan, two stories, with porch on west front only, to correspond with the present porch and building. With material on hand and our own help, we can do this for an expenditure of \$1.000 in material and labor, for which I respectfully request your authority. As the case is emergent I trust it may be given as an open market
