DEPARTMENT OF THE INTERIOR
UNITED STATES INDIAN SERVICE
INDIAN INDUSTRIAL SCHOOL
CARLISLE, PENNA.

J.R.W.
March 1, 1906.

The Honorable,
The Commissioner of Indian Affairs,
Washington, D. C.

Sir:

Referring to Office Circular Letter No. 129 Education, dated December 19, 1905, I have to inclose herewith a report of farm statistics for the two school farms at this school for the calendar year 1905.

As directed, the map showing the locations of the two school farms and also of the school grounds proper, and the leased lands, is inclosed with such report. The division of the farms into fields is indicated on the map, which is drawn to scale and is substantially correct.

There is also inclosed, as suggested, an inventory of stock, machinery, vehicles, supplies, etc., on hand at the close of the calendar year 1905, and the estimated value of the several articles together with the area and estimated value of the farm lands, which also includes the value of the farm buildings, is given.

Very respectfully,

W. A. Mercer
Major 11th Cavalry,
Superintendent.

JRW-S

P.S.--Please send us four blue print copies of the above tracing map of the school farms.

FARM STATISTICS.

*Indian Industrial School,**CARLISLE, PA. School,**Agency**Calendar year 19⁰⁵**W. A. Mercer Major 11th Cav. Supt.*
Supt. or Agent.

E

INSTRUCTIONS.

At the close of each year a report giving Farm Statistics will be submitted upon this form to the Indian Office.

This report will include the entire year's operations, and must be compiled from data actually collected and recorded during the year.

Superintendents will be careful to fill out every item of the report. Where there is nothing to report, that fact must be noted against the item or column affected. Schools that have no farm may note that fact across the face of the blank and return it to the Indian Office.

Value.—The value to the Government of products raised or manufactured on Indian school farms is equal to that which the school would have to pay were it necessary to purchase the same in open market. To secure a fair market value, and to establish a uniform scale of values for comparison from year to year, all values given in this report will be those of the local market at the time of harvesting each crop.

Superintendents will submit with this report a map or sketch of the school farm, showing its location with reference to the school; the location and area of the different parts of the farm, viz: timber, pasture or grazing, orchards, gardens, fields under cultivation, location of the different crops, etc.; also the location of farm buildings, fences, etc.
