A good piece of printing is certainly a delight to the mind as well as to the eye, and everything about your annual report, from the card with your compliments past the design on the cover, to the very end of the document, reflects great credit on Carlisle.

As you may imagine, the emphasis you give to what the graduates of Carlisle are doing hits me just right. I am also glad to see the space devoted to your analysis of the outing system, which, as you know, I regard as perhaps the greatest single contribution to Indian education which has been made.

Sincerely yours,

(Signed) R. G. Valentine.
Commissioner.
