Mr. Roy H. Bradley,
Director of Mechanic Arts,
Carlisle, Pa.

NOV 19 1915

My dear Mr. Bradley:

FILED BY G. P. F.

There is forwarded a drawing of cottage #10 intended for cheap stock construction, and when sent out the specifications will cover changes in construction of the foundations to suit local conditions of the place where it is erected. As drawn the foundations were made to suit the conditions at Tule River and also to reduce the cost of construction. The same is true of the pitch of the porch roofs which will be changed by specifications to suit conditions as above referred to.

You will please look the drawing over and return it, together with suggestions as to such changes which in your judgment should be made in it.

Very truly yours,

(Signed) E. B. Meritt

11-RCG-16.

Assistant Commissioner.
