No. 1

THE AVERAGE MAN

THE average man is the man of the mill,
The man of the valley, or the man of the hill
The man at the the throttle, the man at the plow
The man with the sweat of his toil on his brow,
Who brings into being the dreams of the few,
Who works for himself, and for me, and for you.
There is not a purpose, a project or plan
But rests on the strength of the average man

The man who, perchance, thinks he labors alone,
The man who, stands out between hovel and throne
The man who gives freely his brain and his brawn,
Is the man that the world has been [built] upon.
The clang of the hammer, the sweep of the saw,
The flash of the forge—they have strengthened the law,

They have rebuilt the realms that the wars over-
run,
They have shown us the worth of the average
man.

IMPROVEMENTS

AT CARLISLE

Two years have passed since Major Mercer arrived at Carlisle to assume the Superintendency. During that time many valuable improvements have been made. The most noticeable are:

GREEN HOUSE

The fine large greenhouse is located south of the academic building on the west side of the ground upon which the new hospital will be erected. From the greenhouse we have been able to supply thousands of plants for the numerous beds which have added so greatly to the beauty of the grounds which have never before looked so well. It gives us also an abundance of beautiful plants for decorative purposes when needed.

THE LIBRARY

The library was originally located in the principal's office. Each year as additions were made to the growing library, the available space grew less and less until the principal's office was moved to the room opposite. The need of a larger room for the library became a necessity and Major Mercer decided to build an addition to the academic building extending south. The first floor of this building is the library, a room 40x58 feet well lighted and well ventilated, and having entrances from the academic building as well as from the outside.

THE STAGE

The old chapel now known as the auditorium was too small to hold the student body comfortably. The capacity has been greatly increased by removing the large platform that was in the north end and placing the gallery there. The seats were changed to face the new stage at the south side over the library in the new addition. The stage is one of the largest and finest in the Cumberland Valley. It is 40x58 feet having a proscenium opening of 35 feet. The stage is thoroughly equipped with electric foot lights, orchestra lights, border lights, etc. A beautiful drop curtain, parlor, church, kitchen, street, garden, landscape, mountain, and other scenes and accessories make up the equipment. The scenery was painted by Mr. Harry Russell one of the finest scenic artists in the country. Large double doors

THE SCHOOL BUILDING

open outward from the rear of the stage to a large inclosed vestibule from which a fine view of the surrounding country can be had. Leading from the vestibule to the ground on both sides are large stairs protected by iron rails.

These will serve also as fire escapes. The two arc lights that lighted the auditorium, at the best very poorly, were replaced by two beautiful chandeliers each having 37 incandescent lights which have worked a wonderful transformation in the lighting.

TOILET ROOMS

Two toilet rooms have been built in the south-east and south-west angles of the academic building.

BRIDGE CONNECTING THE GIRLS' QUARTERS WITH THE GYMNASIUM.

It was always necessary for the girls to go out in the rain and snow to reach the gymnasium to attend gymnasium classes and socials, but the new enclosed bridge now permits them to go to and return from the gymnasium without going outside. This is a great convenience.

GIRLS' CLOTHING ROOM

This new addition to the girls' quarters fills a long felt want and will be a great help in caring for extra clothing.

The new washroom which has been built under the clothing room will be a great convenience.

For a first-class Lunch & Meals go to the

ROOSEVELT CAFE

OPPOSITE POST-OFFICE

TROPHY HALL

One of the most picturesque features of the school is trophy hall. The large entrance hall to the gymnasium has had a fine glass front put in, additional lights have been installed, and the interior painted in gloss white. Railings a couple of feet from the wall mark the isle leading to the gymnasium entrance proper. Hanging between the isle and the walls are trophy foot-balls painted on one side in our school colors, while on the other are the colors of the competing college. The names and scores are lettered in gold. Hanging over each ball is the proper college pennant made of silk of the proper colors. On the walls are hung trophy banners, pictures of our baseball, football, and track teams for each year, as well as individual pictures of team captains and others. From this hall, doors lead into the shower baths, reading room, athletic office, and gymnasium prop-

er. Over the gymnasium door is draped a beautiful silk Carlisle flag while in the corners are stacked carbines—the whole making a most beautiful picture, and a very appropriate entrance to the gymnasium.

GYMNASIUM

The installing of incandescent lights and drinking water in the gymnasium proper has added greatly to the comforts of the place.

The industries have received considerable attention. Among the many improvements in this department are:

THE PRINT SHOP

The print shop has been moved to the first floor of the shop building. A new Challenge-Gordon press and much type has been added to the already good equipment. The cylinder press was placed on a concrete foundation, and individual motors installed to run each press.

Miscellaneous Items

➔ Ernest Sutton is expected to arrive tomorrow.

➔ Cheyenne and Chippewa are the names of the new black horses.

➔ Herbert Johnson, writes that he is now working at Rochester, N. Y.

➔ Stella Skye returned on the 20th with four new students from Oklahoma.

➔ Miss De Cora who has been spending her vacation in New York City returned looking well and glad to get back.

➔ Joseph Loudbear who met with an accident a few days ago is improving very rapidly.

➔ Francis Freemont and Melinda Cayuga were married in Oklahoma, on the 22nd of August.

➔ We are all anxious to see our country students. They will come in to-day and tomorrow.

➔ All our teachers have returned from their summer's outing and are eager for the opening of school.

➔ Many of the students are glad to welcome Miss Beach back again. The Library will be open now every evening except Saturday.

➔ Henry Markeshum is working as a typo at Seattle, Washington. He is a member of the International Typographical Union.

➔ Rosabelle Patterson left for her home in Irving, New York, last Thursday.

➔ Miss James returned from her vacation last week.

➔ Electa Metoxen, writes to her friend Emma Webster than she has a nice place in the country and will stay out for the winter.

➔ A pretty souvenir postal from Etta Crow shows the "Benjamin West" house at Swarthmore where she has been spending the summer. It is evidently a very pretty place.

➔ John Philips who came from Grand Park, New York, died Sunday afternoon. He had been a patient sufferer from tuberculosis. The remains were sent to New York for burial.

➔ A souvenir postal from Archie Dundas shows the beautiful "Casino at Long Branch" where our band is stopping.

The band continues to grow in popularity. One more week and we will be able to again enjoy its playing.

➔ Mr Samuel Morris of the Government Printing Office at Washington, D. C. was the guest for several days of his niece Mrs. Thompson. "Uncle Sam" as he is familiarly known spent much of his time with our typos and gave them many valuable pointers.

➔ Miss Blanche Joslyn Bushnell and Mr. Edward Henry Colegrove, our popular disciplinarian, were united in marriage on August 15th at the home of the bride, Gilbertsville, New York. The bride and groom were given a most cordial reception on their arrival. It is a great pleasure to extend a hearty welcome to Mrs. Colegrove.

➔ In a letter to "ye editor" renewing her subscription to The Arrow, Lillian Complainville Keller, class '98, who is living at Columbia, Mo., says "I do not know just when my subscription expires but I do not want to miss any copies. It is the only letter I get from Carlisle, and I look forward to its coming as anxiously as I do my home letter. Remember me kindly to all."

ONE OF OUR FORMER STUDENTS GRADUATES FROM THE UNIVERSITY OF PORTO RICO

Ponce, Porto Rico., August 21, 1906.

Major W. A. Mercer, Carlisle, Pa.

Dear Major:

I want to thank you for having so kindly remembered me with one of the pictures of the class, '05.

I am now in Ponce, spending my summer vacation after having spent a whole year at the University of Puerto Rico, where I graduated last June.

On Sept 24th I will begin my work as a teacher hoping to be of service to my people and the island. Wish some day I will be able to come to visit Carlisle and my friends there.

With best wishes, I am
Yours very Respectfully,
Augela Rivera

Aurora, No 1. Porto Rico

JAMES DICKSON HEARD FROM AT WINONA LAKE, INDIANA

August 27th 06.

My dear Major Mercer:

I am about to go back to the Moody Bible Institute. I certainly had a very delightful time all summer. There have been many Conferences held, the last one is the Bible Conference and I enjoy hearing some of the great men of to-day.

I began to work in the hotel for \$15 a month and as I did my work so well in two weeks they raised my wages to \$30 a month and I get off four hours each day. I thank you for the help you gave me while I was at Carlisle. Please send my Arrow to 80 Institute Place Chicago, and oblige.

I am Yours,
J. G. Dickson.

Valley Junction, Wis.
August 28, 1906.

Dear Major Mercer:

I arrived home all right and I am getting along very well. I had no trouble whatever in making changes.

Sincerely yours,
Florence White.

Browning, Mont.
Aug. 4, 1906

Dear Major Mercer:

I arrived home safe. Every one was glad to see me. I am working for my father on his farm. My father has been sick for sometime and I have to do all the work myself.

I hope to be remembered to all my friends at the school.

Sincerely yours,
Silas Arrowtop

Hogansburg, N. Y.
Aug. 18, 1906

Dear Major:

Sister and I had no trouble on our way. We had a very nice journey, and found mother waiting for us at the station. It is quite warm here.

From your student

C. E. Cooke

➔ The Academic Department opens Tuesday for the ensuing school year. This means that the opportunities of another year's schooling are before them. How much you benefit by it will depend upon yourself.

The following interesting extract is taking from an article in the September Outlook, written by Dr. Nathan C. Shaeffer, Superintendent of Public Instruction of Pennsylvania:

"The greatest legacy any man can leave his children is a sound education. It is a trite saying that knowledge is power. The educated youth can go out into the world and face life's problems on an equal footing with the best of compeers. He can cherish and realize ambitions impossible to the uneducated or half educated. He cannot merely win the comforts that money will buy, but he can also enjoy the things of the mind and the higher life. He can think the best thoughts of the best men as these are enshrined in literature, and he can think the thoughts which God has put in to the starry heavens above him and into all nature about him divine thoughts which are formulated into science as rapidly as man discovers them. A heritage of millions is not so valuable to the individual as the legacy of schooling which puts into his hands the tools with which he may carve his own fortune, the weapon by which he may achieve his own destiny."

A Revolutionary Hero Honored.

An extract from the August 25 Outlook

THE unveiling of the Mercer monument at Fredericksburg, Virginia, will bring to the quaint and historic little town, midway between the capital of the country and the once capital of the Confederacy, a notable group of distinguished men. The presence of these gentlemen will not only add dignity to the occasion, but will also attest a Nation's desire to pay tribute to a brave soldier who served it well; for the erection of the Mercer memorial is in pursuance of an act of Congress passed on the eight day of April 1777, which act provided that "a monument be erected to General Hugh Mercer at Fredericksburg in the state of Virginia," and prescribed an inscription to be placed thereon. Up to a short while ago, however, nothing had been done towards carrying into effect the action taken in 1777, but by act of Congress, approved June 28, 1902, it was again provided that the monument be erected and a suitable inscription placed upon it.

Although General Mercer did not come to America till he was twenty-six years of age, he was as loyal a patriot as a son of the soil, and by his brilliant services to his adopted country merited worthily the confidence of the latter, as well as the friendship of Washington, through whose influence he was commissioned by Congress a Brigadier-General in 1777. Born on January 12, 1721, in Aberdeen, Scotland, educated at its University, Hugh Mercer entered the medical profession and served at Culloden under Charles Edward, the Young Pretender, as assistant surgeon. Coming to America in 1747, he settled as a physician near what is now Mercersburg, Pennsylvania, but, at heart a soldier, he gave up his profession for a time and enlisted as a volunteer under Braddock, later rising to the rank of captain and later still to that of lieutenant-colonel. The outbreak of the American Revolution found him again a physician, however, this time at Fredericksburg, Virginia, where he at once entered the conflict and organized a regiment of which he was made colonel. Wounded at the battle of Princeton, he died a week later in the arms of his aide-camp, Major Lewis, and was buried at Philadelphia, where in Laurel Hill Cemetery a monument was erected to his memory in 1840.

General Hugh Mercer is an ancestor of our superintendent, Major Mercer.

WHAT A BOY CAN DO

By Niron Waterman.

These are some of the things that a boy can do:
He can shout so loud the air turns blue;
He can make all sounds of beast and bird
And a thousand more they never knew.
He can crow or cackle, chirp or cluck,
Till he fools the rooster hen or duck;
He can mock the dog or lamb or cow,
And the cat herself can't beat his "meow."
He has sounds that are ruffled, striped or plain;
He can thunder by like a railway train,
Stop at stations a breath and then
Apply the steam and be off again.
He has all his powers in such command
He can turn right into a full brass band,
With all of the instruments ever played,
And march away as a street parade.
You can tell that a boy is very ill
If he's wide awake and is keeping still,
But earth should be—God bless their noise!—
A dull old place if there were no boys.

—Glen Mill's Daily.

The August number of the Garden Magazine strikes an unexpected note of activity at this time of the year. For one thing, it is necessary to begin greenhouse building in the middle of summer if you are to be ready before the approach of winter. By planting strawberries in August you can get full crops next spring. A timely article for the suburban gardener who is planting new ground is found in I. G. Tabor's scheme for the development of a lot 100x25 feet, in which the complete scheme is developed for planting evergreens now as a background for the bulbs etc. in the fall. Wilhelm Miller has a fascinating story "The Cultivation of native Orchids." Two articles are devoted to greenhouse construction and to the cultivation of plants under glass for cut flowers all winter. William Clark explains the necessity for sowing flower seeds in summer, thereby gaining a year on the flowering season. "The Ten Best Hardy Conifers," are illustrated in a superb series of photographs the accompanying text being supplied by J. W. Duncan, Assistant Superintendent of Parks at Boston. All these should be planted during August. Currants and gooseberries, which are best set out in the fall, are discussed by S. W. Fletcher. Thomas McAdam writes on "Bulbs for August Planting." E. D. Sanderson sounds a timely warning in his plea for clean gardens, in which he explains how fall cleaning up is fatal to four common and destructive insect pest.

The Pacific Coast Institute.

The Pacific Coast Institute was held at Tacoma, Washington, August 20, to 25th. The general Indian Service Institute, which is a department of the National Educational Association intended to hold its convention at San Francisco, California, but on the account of the catastrophe there, decided that it would not be practicable and will therefore, unite with the Pacific Coast Institute. Miss Estelle-Reel, Superintendent of Indian Schools will be in charge. An attendance of from 800 to 1000 is expected and a full and very interesting program has been arranged. A brief of the proceedings will be given in a later issue.

A SHIP'S SPEED.

A ship's speed, as you know, is reckoned by knots, a knot being a geographical mile, or one-sixtieth of a degree. Six geographical miles are about equal to seven statute miles, and a ship that sails 12 knots, therefore, is really moving at the rate of fourteen statute miles an hour. It should be remembered that it is in-correct to say so many "knots an hour;" simply so many knots, for a knot means "one mile an hour."

THE CARPENTER SHOP

The only thing in the carpenter shop resembling a machine was an old style lathe which was run by hand power. Now we have power furnished by individual motors to a planer, a circular saw, a moulder, a scroll saw, and a fine up-to-date lathe. When a boy becomes proficient in doing all kinds of work by hand, he is taught how to use the machines. It is almost impossible to estimate the amount of useless hard labor these machines have already saved.

All window frames, sash, door frames, doors, mouldings, etc. used previous to the installation of these machines were bought at the mills, but since their installation all these things have been made by our own boys. A convenient building for the storing of lumber has been needed for a long while. The carpenters have erected such a building adjoining the carpenter shop.

MASONRY, BRICKLAYING, PLASTERING, and CEMENT WORK.

These departments were inaugurated a few months ago. The value of these trades has already been demonstrated by the erection with our own labor of our artistic photographic studio which is constructed of cement blocks. The following article about this building is taken from "The Carlisle Volunteer".

"The first building planned and erected by the Indian boys of the Carlisle school is nearing completion and in a few weeks will be ready for use.

It is the new photograph gallery located at the trolley entrance to the school. The building is as pretty as it is unique and reflects credit upon the Indians as architects and builders.

The superstructure is of Portland cement blocks of gray color. The building will be finished in fortress style with flat roof. It will be but one story high with a separate room for the printing of the photographs. In the ornamentation the national colors and the red flag of the school predominate.

A wide veranda extending along the trolley track will be used as a trolley depot to accommodate travel, especially in rainy and wintry weather.

With the exception of general directions given by Major Mercer, the plans have been prepared and the work done by the Indian boys. The stone work, too, was done by them under the supervision of Mr. Lamason and it will be a fine sample of Indian intelligence and workmanship."

VEGETABLE-PREPARING ROOM.

A large vegetable-preparing room has been added to the kitchen. It will have all the conveniences necessary to properly prepare vegetables, etc. for cooking.

DOUGH MIXER

A fine power dough-mixer is now in use in the bakery, adding greatly to the possibilities of this department. This method of mixing lightens the work very much, and is more hygienic than the old way.

ATHLETICS

An additional dressing room has been added to the cage. It contains fifty lockers with combination locks, shower baths, rubbing room, store room, and other conveniences. A fine maple floor has been put in the cage which makes it an ideal building for all purposes. An additional athletic field was partly made last summer and will be completed this fall. This will be used for baseball while the old field will be reserved for football.

A fine hydraulic ram has been in use for

To Agents and Superintendents

In buying a buggy or a wagon from us you save money. The saving represented is the difference between the MANUFACTURER'S COST and the MERCHANT'S RETAIL PRICE. There are all kinds of vehicles on the market at all kinds of prices. It is poor economy to buy a poor article because it is cheap. WE use the BEST MATERIAL AND WORKMANSHIP in all our conveyances and sell them to you AT A SMALL MARGIN ABOVE COST OF MATERIAL.

OUR BUGGY

BODY—Corning style has poplar panels, ash sills and seat frame, well braced and full ironed with oval edge irons on top of panels. Corners are screwed, glued and plugged. Wide seats, comfortable and easy riding backs. Can furnish piano box style when ordered.
WHEELS—Sarven or Warner patent, best quality.
GEAR—Single perch, ironed full length on bottom, well braced. Full clipped axle beds. Substantial throughout.
SPRINGS—FOUR leaf, elliptic oil tempered steel, or Concord style.
AXLES—Best quality drawn steel, highly tempered. Hickory axle beds, full clipped.
TRACK—Narrow, 4 feet 8 inches, or wide, 5 feet.
TOP—Hand buffed leather top, with 28 oz. blue back rubber curtains.
TRIMMINGS—Hand buffed leather. Spring cushions and backs.
PAINTING—Each coat of paint is thoroughly rubbed before the next is applied. Only the highest grade paints and varnishes are used. Fourteen coats are used in the process of painting. Body is plain black. Gears are black and red. Painting will be done in other colors if desired. Poles are best hickory, full ironed and braced. Shaft will be furnished in place of pole if desired.

This offer is made alike to employees of the Indian service and to Indians.

For descriptive circulars and prices address,

**MAJOR W. A. MERCER, SUPERINTENDENT,
U. S. INDIAN SCHOOL, CARLISLE, PA.**

sometime supplying water to the athletic field.

POULTRY FARM

The poultry farm consists of two new (and two old) commodious chicken houses and a large brooder house which includes an incubator room having four incubators. The boys are here taught thoroughly all about poultry raising as a business.

DAIRY

The latest improvement and one of the most necessary has been the erection at the near farm of a large water tower holding over 2000 gallons. This supplies several hydrants which have been located at convenient places, thus conveying water where most needed from our fine spring, the power being at ten horse power gasoline engine. A new milk house is now being finished. It adjoins the engine and pump house permitting the engine to be used in running the separator and churn.

BETTER GO TO SCHOOL

Boys who get tired of going to school should read the following written by Superintendent Adams of Fayette (O.) College: "The average educated man gets a salary of \$1,000 per year. If he works forty years he earns \$40,000 in a lifetime. The average day laborer gets \$1.50 per day 300 days in the year, or \$450 in a year. In forty years he earns \$18,000. The difference, \$22,000, equals the value of an education. To acquire this earning capacity requires twelve years at school of 180 days each or 2,160 days. Divide \$22,000, the value of an education, by 2,160 the number of days required in getting it, we find that each day is worth a little more than \$10 to a pupil. Can't afford to miss school can we?"

Industrial Notes

- ➔ Threshing has started at the near farm.
- ➔ The floor of the training quarters has been painted.
- ➔ Mr. Barron and his boys have kept the grounds looking fine.
- ➔ The bridge near the studio was recently repaired by Oscar Naterook.
- ➔ Harry Shawbush and Isaac Gould are our champion blue-washers.
- ➔ Zoa Hardin is our champion shirt maker. Her record is six in one day.
- ➔ The carpenters have placed the bleachers in good condition for fall use.
- ➔ The clocks in the school rooms have been put in good running order by Mr. Lau.
- ➔ The school room floors are being gone over with "No Dust" and linseed oil.
- ➔ The walls of the old library, now the principal's office, have been painted.
- ➔ The bachelors' quarters have been renovated and the ceilings and walls finished with alabastine.
- ➔ Mary Murdock has had charge of a class of small girls in the sewing room for several weeks and deserves special mention for her excellent supervision.
- ➔ John Archuleta and Jose Juan have finished several sets of harness during the absence of Mr. Zeigler.
- ➔ Repairs to the interior of the student's quarters have been made by the plasterers and the carpenters. The carpenters have repaired many of the porch floors.
- ➔ Mr. Dillon is spending a few days at Point Pleasant. During his absence David Oldman is in charge of the blacksmith shop.
- ➔ Twenty bright red benches were turned out by the painters last week, and placed on the girls' campus.
- ➔ Mr. Lau and his boys have screened off the rear porches of teachers' quarters with lattice work.
- ➔ The halls of the dining room and floors in the dining hall have been painted. They look nice in their new dress.
- ➔ The falling of a small piece of plaster from the ceiling of the auditorium has given extra work to the carpenters, plasterers, and painters.
- ➔ Saturday evening a serious burst occurred in the water main in the girls' court, which necessitated shutting off the water supply for several hours.
- ➔ Mr. Weber and his boys, Grover Long, Eli Peazzoni, and Harry Bissell, had to work until quite late before the necessary repairs were completed. Rain added much to the already disagreeable task.
- ➔ Mr. Carns and his force, mostly green hands, have blue-washed the exterior of the academic building, teachers' quarters, girls' quarters, small boys' quarters, large boys' quarters, gymnasium, and shops.
- ➔ They have gone over with either alabastine or calomine, the interior of the girls' quarters, and the small boys' quarters.
- ➔ Considerable painting has also been done in the small boys' quarters
