## GENERAL SCHOOL NEWS.

(Left over from last week's reportings.)

The pupils started their school gardens last Monday.

Aaron Poodry has been working for some time in town. He is studying telegraphy.

Many large boys are making applications for the country. They will leave the first week of May.

There is quite an early spring in Oklahoma—fresh vegetables from the garden are being used.

Out in Montana they are having snow storms yet, while here we are enjoying beautiful spring weather.

Otis Frazier, working at the first farm, expects to be a farmer when he gets back to his home in California.

Elsie L. Valley, who is laundress at Washunga, Oklahoma, is doing well. She often feels lonesome for Carlisle.

Mr. Wallace Denny has organized a team consisting of boys from his quarters, and his manager is Harry Woodbury.

James Thorpe, while practicing with the shot last week, established a new record for himself by putting it forty-three feet.

Alvin Kennedy, of the small boys' quarters, has been promoted from ranks to sergeant. We all wish him further promotions.

Walter Hunt, who went out to the country, states that he has a fine place and wishes to be remembered to all his friends and classmates.

William Newashe, the catcher of our team, played a wonderful game at Atlantic City. We all wish him to keep it up for the rest of the season.

Mary L. Silas has returned from the country and joined the Freshman Class. While out during the winter she attended a school in Hatboro.

Many beautiful postal cards have been received from Fred Tallerane, who went home some time ago. He states that he is having a fine time.

Those who are going home this coming June are patiently waiting for the time to arrive. These eight weeks seem a long time, but they will pass in time.

Paul Dirks writes from Seattle, Wash., that success is with him. He wishes to be remembered to all his school-mates. He expects to return to Alaska in the near future.

Alexander Arcasa, who is living in Ivyland, Bucks county, Penna., writes that he is getting along well with his work. He also states that he has gained several pounds already.

The vocal duet given by Romona Wagoner and Anona Crowe at the Susan Longstreth Literary Society last Friday evening, was greatly appreciated by all who were there to hear it.

Mae Wheelock, a member of the Sophomore class, writes to a friend from Wyncote, Pa., that she is getting along very nicely and wishes to be remembered to her classmates and friends.

Through a letter to his sister Mr. A. M. Venne, a former student and employe here, now at Chilocco, states that he is enjoying Oklahoma life and wishes to be remembered to his friends at Carlisle.

Through a letter recently received from Martha Day we hear that she arrived home safely and is now enjoying herself with Elizabeth Paisano, also an ex-student of Carlisle, at Seama, New Mexico.

A letter has been received from Eleanor Spring, member of the class 1910. She is having an enjoyable time at her home. She speaks of the fine weather they are having in western New York. She wishes to be remembered to all of the Senior Class.

Martha Wetenhall, who went out into the country with the first party, writes to her friends that she enjoys her country life very much. She says she certainly misses Carlisle.

James Pasiano, one of our typos, left for the country with the first party last Thursday morning. He is missed at the printery by his brother workmen and all extend to him their hearty wishes for a successful summer.

Mrs. Lettie Scott, formerly Miss Lettie Scott, a member of class 1899, has now a nice comfortable home of her own in Buffalo, New York. Her husband, Frank Scott, is also an ex-student. He is a motorman.

The pupils of this institution are proud of having the outing system. There are many who expect to follow farming when they go home, for it is a good industry. We want to raise the standard for our home people.

How nice it seems to welcome the joyous spring time, with the beautiful flowers of various colors, the different birds with sweet songs, to see the trees turning green and our campus wearing a beautiful green velvet dress. It makes us wish to have it all the time.

Mr. and Mrs. Harvey Labelle, of Sisseton, South Dakota, have written to one of their friends here that a little son was born to them on the 22d of March. They have named it Clifford Labelle. They wish to be remembered to their friends here.

Paul C. White, who returned to his home at Sitka, Alaska, a year ago, reports in a letter that he is busy building boats and that he has work in sight for the entire summer. He is to be married to a Miss Dawson of the Sitka Mission and then intends to move to Petersburg, where the communication with the outside world is not so limited, and where he also hopes to find a greater demand for the boats he is building.

Address all communications to the paper and they will receive prompt attention.

### GENERAL SCHOOL NEWS.

The campus was clipped last week for the first time this spring.

In a letter to a friend, Lottie Styles, who is at Atlantic City, writes that she is well.

A small party of boys went to the Cave Sunday afternoon. The boat ride was greatly enjoyed.

Robert Davis, who has been in the hospital for sometime, is out now and ready to resume his work.

William Garlow, our baseball pitcher, was taken quiet sick while on the trip with the team to Philadelphia.

Samuel J. McLean spent Saturday evening at Carlisle. He has an excellent position at Newville, Pa., as blacksmith.

Cecilia Baronovitch, who starts for home to-day, will have Marcia Melvidoff for company on the long journey to Alaska.

Through a letter we learn that Cora Elm is enjoying her country home in Kennet Square. This is the third summer she has been there.

The girls rooming on the third floor are now moving down to the second floor to occupy the rooms vacated by the girls who went to the country.

Our superintendent, Mr. Friedman is out again and able to attend to his duties after a week's illness. We are all glad to see him about the grounds again.

John White, '09, and Stephen Glori visited the Susans' Society last Friday evening. They each favored the society with a solo. Both were greatly enjoyed.

James Lyon, after a few weeks' stay in the hospital with pneumonia, has returned to quarters and his many friends are glad to see him looking so well.

John Russian, who went to the country with the first party, paid us a visit a week ago. He reports a good home and getting good wages.

An interesting game of base-ball was played on the athletic field Saturday between the second team of Gettysburg and the second team of Carlisle. The score was in favor of Carlisle: 6 to 4.

Last Monday afternoon William Nelson, Senior, gave an excellent talk about the Blacksmith trade. He spoke of the modern shops being run by power to keep up the fires instead of by bellows.

John Simpson, of Pawnee, Oklahoma, who has been wintering here, left for his home today improved in health. Mr. Simpson is a former pupil of Carlisle.—Native American, Phoenix, Arizona.

William White, an ex-student of Carlisle and an up-to-date blacksmith in southern Wisconsin, is getting along well in spite of the difficulties which confronted him before he got well started in business.

Last Friday the Susans' program was well rendered. Each number was a success. The discipline was excellent. Susans let us keep up our society spirit and make our meetings enjoyable and interesting.

Miss Shultz, matron of the clothing room, spent Saturday afternoon and part of Sunday with her parents in Harrisburg. The girls greeted her return on Sunday evening with requests to be taken out for a walk.

William Hildebrandt, a farmer near Shippensburg, has hired two Indian boys from the Indian School for the summer and says that he is pleased with their work thus far and that they make excellent help.—Carlisle Daily Herald.

Stephen Glori left for New York City Wednesday evening, where he expects to enter his trade as a printer. Stephen, who is our only Filipino, has been a faithful student while here, and his friends will miss him. We all wish him success.

Many beautiful postal cards have been received from John Runsclose who went home last week. He states that he had a pleasant journey and arrived home safely. John is a member of the freshmen class and printing force and we all miss him.

Savannah Beck, who has been nursing in the hospital during her time here at Carlisle, will leave us next month for West Chester, Pa., where she will live with Mrs. Hayes. Savannah will be greatly missed by the students, for she was always a patient and willing nurse.

Last Monday evening on the invitation of Mrs. Friedman, The Carlisle Fortnightly Club, with invited guests met in the Indian School auditorium to enjoy an illustrated lecture on Egypt, given by Dr. Billheimer of Gettysburg. Members of the faculty, the Senior, Junior and post-graduate classes were present.

The Arbor Day exercises were held in the auditorium Friday afternoon. Prof. Hutchison of Conway Hall, who gave the address, won the attention of his audience, and his very able remarks were evidently closely followed to the end. On account of the disagreeable weather the planting of the trees was postponed until Monday. They were then planted by Mr. Hoffman and his boys.

In spite of the small number of Standards left the society still holds lively meetings every Friday evening. William Nelson, president, carries on the meetings in the usual way. The program is principally a volunteer one. Last Friday evening Isaac Quinn's declamation on "Blennerhasset," Alvin Kennedy's story of the patriot spy, Harvey Birch, and the "Reporter's Notes" given by Johnson Enos, deserve special mention. Any one of them would have been a credit to any preparatory school boys' society in the country.

The San Francisco Chronicle says: Under the watchful paternal eye of the United States Government Miss Matilda Hancorne, a shapely and beautiful Indian girl whose home is at Orick, Humboldt County, completed a wearisome journey across the continent Sunday. Aside from her inexperience in traveling there was little need of the Federal Government taking such precautions regarding Miss Hancorne's journey, for she is a bright, wideawake girl who speaks English perfectly and bears herself with an independent carriage. If there is anything about her to attract attention in a crowd it is her beauty and the perfect taste with which she dresses. She came from the Carlisle Indian School.

## GENERAL SCHOOL NEWS.

A force of men are tearing out the interior of the old hospital. It is to be re-arranged for athletic quarters.

Miss Wood visited the Standards last Friday and gave some encouraging remarks to the society.

The clothing room girls were kept busy this week packing trunks and getting the girls ready who go to the country.

Mr. Weber was absent from the shop a few days last week on account of being sick. It isn't very often he is absent.

Capt. Jones' base ball team tied with the great "Local Fans" last Friday. Score, 3 to 3. Capt. Jones did some great twirling.

Last Sunday morning after Sunday school Mr. Miller took a number of girls to the Cave to gather violets. They enjoyed the walk very much.

While the Varsity baseball team is having hard luck over their games, the second team is doing very nicely with theirs.

A large number of Catholic girls took Communion last Sunday. After early mass the majority stayed in St. Katherines Hall and sang new hymns.

Walter Hunt, who went to the country in the first party, was among the spectators at the relay races on Franklin Field last Saturday.

The meeting of the Y. W. C. A. Sunday evening was led by our new president, Sara Hoxie. There was quite a large attendance and the meeting was very much enjoyed.

Mrs. William Deitz, our Indian Art teacher, is busy getting things for the Indian Exhibition in South America. She has selected two rugs, one a Persian weave and the other a Hopi Indian weave.

The carpenters are kept very busy these days making door and window screens. Having completed a set for the printing department they are supplying Supt. Friedman's residence.

Most of the Seniors are very interested in the study of Indian traditions. At present papers are being written on an Ojibwa tradition which contains quite a few peculiar thoughts that old Indians had about the creation of the earth after the floods.

They seniors selected a maple as their Arbor-Day tree. It is planted between the hospital and Doctor's cottage and from it waves the class pennon. The location is a fortunate one because should the tree getsick it can be attended to immediately.

The house girls have been very busy during the past week putting in order the rooms vacated by the country girls. After the second party leaves Friday morning the third floor will be closed and only the first and second floors will be used.

Last Wednesday evening's Bible Class for Catholic girls was agreeably interrupted, when the Right Rev. John McSherry, Vicar-Apostolic of Port Elizabeth was ushered in. The good Bishop's diocese is in Cape Colony, South Africa. He made a very pleasing address in which he drew a striking contrast between the conditions of the Indians here and the lot of the natives under his spiritual care in Cape Colony. Concluding with a few brief remarks on the obedience we owe to our superiors, he blessed us all and departed. We wish the Bishop Godspeed on his voyage homeward, and while thanking him for honoring us by a visit, we regret that his stay among us was all too brief.

## Class Contest Won by Sophomores.

The enthusiastic and loyal Sophomores won the class championship in athletic sports on Wednesday by the remarkable total of 62 points out of a possible 143. This is the highest score any class has ever made. Rooms number 9 and 4 were tied for second place with 15 points each, while the Juniors and number 6 came next with 10 points each. James Thorpe broke the record for total number of points scored, his total being 33 points. The former best individual performance in the class contests was made several years ago by Wilson Charles, who scored 27 points. Thorpe also broke the school record in the shot-put by a heave of 43 ft., 4 inches. He also equaled the record in the high jump.

The weather was ideal and class enthusiasm and spirit was greatly in evidence. The Sophomores have a great class and if they live up to their motto great things may be expected of them. Summary will be in the ARROW next week.

## ABOUT CARLISLE ATHLETICS.

Last week a member of the baseball squad and three members of the track team were dropped from athletics because they violated their promise, express and implied, by breaking the rules of training. Two of the athletes thus disciplined were important members of the track team and by their conduct, which made it necessary to drop them, they have severely crippled the team and their classes lost valuable point winners in the class contest.

The members of our athletic teams should realize that they represent not only themselves but their class, the student body and the whole school, and they should be careful not to betray the confidence, trust and responsibility they have had the honor of being placed upon them by being chosen to represent the school upon the athletic field.

When a member of a team does violate his obligations to the school, his class and his team in a way which makes it necessary to drop him from athletics, thus weakening the team of which he is a member, he should incur the ill-will of the whole school and make himself decidedly unpopular with his classmates.

All the students should realize that the members of the school teams are representing *them* and they should use every influence to keep them in strict training so that the honor of the school may be upheld at home and abroad and Carlisle's reputation in athletics properly sustained.

The relay team ran a creditable race at Philadelphia last Saturday and won the third place in a field of eight fast teams. The time of the winners was 3 min., 31 4-5 sec. for the mile, which is an average of less than 53 sec. for each quarter mile. Captain Thomas cleared 21 ft., 1 1/2 inches in the broad jump, which was won by Mt. Pleasant, formerly of this school, by a leap of 23 ft., 3 1/2 inches. Thomas high jumped 5 ft., 7 inches. This event was won by Porter, the Olympic champion. Schenandore was unplaced in the high hurdles.

Next week the track team goes to Syracuse and will meet the fast Syracuse University track team in the third dual meet between these two teams. Each team has won one contest from the other, so that the meet Thursday will be the rubber.

**TUBERCULOSIS.**

EVELYN PIERCE, Seneca.

(Results of Dr. Shoemaker's talk in the auditorium, April 5.)

Tuberculosis is a disease of the lungs that is now known to be common to any climate, whether hot or cold.

The symptoms of consumption are, loss of appetite and interest in enjoyments, sweating during the night, loss of color and weight, coughing, bringing up sputum and being tired out easily.

A person having these symptoms should be given a large airy room all to himself. The windows should be left open all the time to allow the pure air and sunshine to enter and circulate throughout the room.

Good nourishing food should be given to consumptive patients and milk and raw eggs have been considered the best.

Patients too weak to exercise should be out in the open air all the time, but should not be allowed to do anything.

School rooms, sleeping rooms, etc., should always be well ventilated, and persons living in cities should leave their windows open at night as well as in the daytime.

**SIGNS OF SPRING.**

EDITH HARRIS, Catawba.

Spring has come and the people are busy cleaning house. Spring is so nice that we do not like to clean house in warm weather, but it must be done. The weather here is beginning to get warm and different birds have begun to come back from the south and will soon begin building their nests.

The grass, flowers, and leaves are beginning to come out. We are all glad to see spring again—we all enjoy spring walks and flowers.

The farmers are getting their gardens ready to plant seeds, so as to have vegetables of their own. The spring chickens are starting to hatch now and the chickens are laying, too. The farmers are plowing and fixing up fences ready for the summer.

Now as the caterpillars and other insects are making their appearance farmers are spraying trees to kill them. As it gets warm you can see

the girls at Carlisle roller skating, jumping rope, and playing tag.

**A Letter To One of Our Boys.**

Higher Grade Primary School,  
Philadelphia, March 26, 1909.

For George Galashoff,  
1326 W. Allegheny Ave.

Dear George—I desire greatly to express to you in some way our appreciation of your attitude towards the teachers and pupils of the school since you came to us a year ago. Both Miss Clothier and Miss Stead, in whose classes you have been, have nothing but words of praise for your conduct and work while a member of their classes. I would say that your Carlisle School teachers and friends ought to be much gratified that a pupil of theirs should have conducted himself with so much credit in the Philadelphia Public Schools.

I trust that you may be successful in whatever you undertake in the future. We shall be very glad to hear from you, even though you should be far away from us. I am,

Very sincerely,

MARY W. REISSE,  
Supervising Principal.

**LEGEND OF THE SMALL DIPPER.**

HENRY M. JORDON, Mohawk.

A great many moons ago there lived in a large forest a woman with eight children. The children were always dancing, never stopping excepting to eat.

One day, while they were dancing in a ring, the woman got angry with them for not stopping when she asked them to, and went to strike them with her broom, but they were lifted upward into space.

The woman, seeing them, tried to catch them, but only succeeded in touching one of the boys with her broom. He fell back to earth on his head and changed into a tree. His eyes, nose and mouth are the base, his hair the roots, his arms and legs the branches, while his fingers are the twigs, and his body is the trunk. You may see the tree to this day—it is a very large tree now.

The other children went up and up into the air until they reached the sky, where they were changed into stars in the shape of a small dipper, which you may see in the East on a starry night. If you watch closely, you may see them twinkling, as if they were dancing.

**COLDS AND THEIR CAUSES.**

EVELYN PIERCE, Seneca.

It is said that a starving man never takes cold, and from that we may infer that over-eating is one of the chief causes of colds. Sleeping in close bedrooms and lack of exercise are other causes. A person drenched through in a rain, is not likely to take cold if he indulges in some vigorous exercise to keep up the normal balance of circulation. Persons living a sedentary life are more exposed to colds than others.

A man, taking proper food and exercise, taking daily baths, and breathing fresh air, can count himself unlikely to take cold.

Heat applied internally and externally is our chief reliance in curing a cold. Hot water drawn through the nostrils and slowly blown out relieves a cold in the head. Hot foot baths and hot drinks also relieve a cold, while rest is a good remedy.
