"I suppose that you do not know what has become of me since I left

Carlisle. I am still continuing my education and I am aiming to stay with it for several years yet. Although I am still going to school as well as my classmates at Carlisle, I regret that I am not there to get a diploma. I wish you would extend to the class my best wishes for their success."

Good Report From Outing Student.

The following splendid report of Inga King sent by her matron, Mrs. O. F. Mitchell of Moorestown, N. J., where Inga is working and attending public school, shows that the opportunities offered Inga are appreciated and improved. The following is an extract from Mrs. Mitchell's letter: "Her school reports are seldom below 90, averaging above this in nearly every branch. Her teacher reports that she is one of the best students in her grade."

"Her home work and conduct are also very commendable. These words of praise could not be said of a girl who was devoting her mind and attention to outside interests such as dress, boys, etc. Efficiency in school and home seldom go hand in hand with such traits as have been mentioned. We are glad to report Inga as one of the 'higher class,' which is proved by her determination to remain in school the entire year, so that she may pass to the higher grades next year."

Y. W. C. A. NOTES

By Lucy Charles.

The girls of India need your prayers.

Many of them never get a breath of fresh air; they go out heavily veiled.

They are eager to learn about Jesus, and they suffer a great deal for loving Him.

It is not our heads nor our tongues that do or say wrong things, but what is within us that prompts us.

There is an Association in every part of the world. Your branch of the work here is only a tiny link in a great chain, but the strength of the chain lies in each link.

Thousands of women in India never see God's blue sky except a narrow strip above the terra-cotta walls. They are not allowed on the streets unless they are covered from head to foot.

PIMA INDIAN ARGUES FOR PHILIPPINE INDEPENDENCE.

Daniel N. Thomas, a Pima Indian, of Sacaton, Ariz., who is learning the printing trade at Hampton Institute, Hampton, Va., was one of the speakers of the winning team in the recent Adams prize debate at the Hampton School.

Mr. Elbridge L. Adams, of New York City, who is chairman of the executive committee of the New York Hampton Association, has offered for three consecutive years prizes in debating, consisting of gold fobs. This year the question was: "Resolved, That the United States should now grant the Philippine Islands their independence."

In his plea for immediate independence for the Filipinos, Daniel Thomas said with force and conviction that we are doing the Philippine Islands a great injustice in not granting them their independence.

We are not keeping our promise to them and are, therefore, bringing political disgrace on our country;

We are not capable of governing the Filipinos on account of their distrust of us and the great difference in temperament of the Eastern and Western people, and also because the impulse for good government must come from within;

We are robbing the Filipinos of their initiative and are dulling and weakening their powers, hopes, and the very character of their race, and are taking from them the one condition necessary for economic advancement — freedom;

The retention of the islands is advanced by large corporations of America to protect them in their selfish plans for gaining lands, mines, and wealth in various ways.
