BOOKS.

LIVING voices of the long dead Past! The pure and Heaven-born wisdom of the Sage

Is poured in bounteous streams upon the page;

The wit whose glow and sparkle doth outlast The sudden flash that kindles into flame.
Ye are the true and living souts of men. And by your magic power we own again The spell that binds us to each hallowed name. In you behold the true Promethean fire, Which like a flaming torch, from age to age. The hand of Genius from your altar-pyre, Hath kindled in the breast of Seer and Sage Through you the secrets of the earth and skies Are opened wide to our admiring eyes SARAH J. PETTINOS.

PROFESSOR BAKELESS TAKES A TRIP AMONG NOTED INSTITUTIONS OF LEARNING.

He Sees Howard Gansworth at Princeton.

People who stay at home too long are likely to stagnate. Hence, an occasional pilgrimage becomes a necessity. After a day in Philadelphia, one is sufficiently stirred from his lethargy to crave a little more of the rush of the world.

Sunday, May the fifth, however, must be spent with Howard among the classic prepare one for further flights.

Howard, as everyone knows, is now a senior, and soon to be an alumnus of one of our great universities. These hours spent with him were full of interest and stimulation.

Greatness is in the air and the atmosphere is full of suggestions of the past and its deeds.

Great names meet one everywhere. A visit to the tomb of the famous Johnathan Edwards, followed by a most forceful and eloquent sermon by President Patton in the beautiful college chapel, made a fitting beginning for this delightful day.

A long walk through the fields and groves about the quiet little town on Sunday afternoon left one with a perfect picture of the Princeton landscape with its wealth of rural homes, shady walks, and winding paths fringed with flowers-a picturesque country under perfect cultivation.

We forget, amid these restful and inspiring scenes and associations, all about Indians, Indian education, and Indian

We simply drink in the delights and pleasures of these ideal conditions for the student and scholar.

For the hour we lose sight of the fact that in the pleasant, well-informed, courteous companion of our walk we have this INDIAN PROBLEM by us still, but simplified, solved, verified.

It is not a problem, it never was a problem. Each individual, red or white, is visited and the work of department after home. He said to himself: only a man, ready to take into his own department studied. being the highest and best in God's great structors were enthusiastic and earnest, universe, if allowed to do so under right and pupils intent on very practical work.

peare, a Shaftesbury are the possibilities manual training school courses with the of the lowliest.

A Gansworth has blazed the way through the forest of doubt and uncertain- practical and instructive. ty to the sun-crowned summit of attain-

some chosen field can follow this path IF

Ah, reader, there is the difference between you and Howard Gansworth.

A visit to the library of the University, a magnificent collection, well kept under most approved modern management, with many rare treasures of science, art and literature; to the museums; and some of the many memorial E. Jared, of San Jose, California, is ac- He made a fire just as his friend, the buildings only filled one with a yearning to visit again, to stay indefinitely and study under such delightful conditions.

One fain would wish that more young men, Indians, too, had the taste, the inclinations, the courage, the GRIT, the ambition, the tenacity to undertake the struggle of four years of hard, grinding readers of the REDMAN AND HELPER he toil, under such uplifting conditions that they might, by the training, the better appreciate life and its privileges, and do its thus: sacred work.

must be again on the wing.

A brief visit to the Baron de Hirsch Industrial School in New York City gave an as he was going out to hunt. idea of what that noble man has made possible for the children of those Hebrews Russia and other European countries. The building is a beautiful one, well equipped for teaching the elements of manual crafts with some academic training. The work in the hands of bright, getting something before long. He went enthusiastic, well-trained men, carpenters, plumbers, and machinists, was being ably done.

shades of Princeton, the venerable, to showed conclusively, that training of head, hand and heart will bring out the some rabbits on the edge of the thick man more quickly than the old book brush. He waited a long time for them lowing from an exchange that will be aptraining of a century ago.

> that it is both a home for working girls and a place of industrial training in which domestic science, sewing, dressmaking are taught. Evidence of excel- not to be beaten so easily. He knew one lent and up-to-date management everywhere. The instruction in sewing and thing else failed. cooking is unusually complete and

> A few hours in the New York Trade School which had already closed its sessions for the year (though the work of the classes for the year was still on exhibition) gave one many hints as to the practical value of this training. The stories told of the sacrifices and self-denial of many of the young men who join the night classes to get the training, show how eager the average young man is to be trained and to patch, he stopped and sang this song stand well in his chosen line. Many of the students go out from the school into the trades and occupations of the city to become in a few years the intelligent leaders of their respective crafts.

"Copy! Copy!"-Yes; Here is that nameless printer's boy. The M. O. T. B. ANY lowly Indian boy, (or girl) in S. is in ill humor this morning. Indulgent reader, we shall have to postpone our said the wise fox. So he sang the song chat about work in Brooklyn, New Haven, over and over until the other fox had Hartford, Springfield, Dorchester, Cam- learned it. Then he trotted off home with bridge, and Boston till later. O. H. B. his rabbits.

THE WISE FOX AND THE FOOLISH FOX.

their medicine men. Homer Kelton, a full-blood Mohave pupil at the Ft. Mohave Indian School, wrote it at Mr. forwarded the story to us which reads

They were nearly out of food, so the old fire fox told his wife to get him some dinner

The wife prepared a very nice dinner. She cooked some corn and a chicken—the was over, the old fox trotted off into the woods.

He was happy, although there was no more food at home, for he felt sure of straight to a patch of arrow-weed where many rabbits, snakes and deer lived.

On reaching his hunting ground, the The pupils, alert, interested, active, old fox hid under a bush and waited for something to appear. Pretty soon he saw to come out. But instead of coming out, The Baroness de Hirsch School for they finally went further in where he girls was next visited. This is unique in could not see them. The brush was so thick that he could not fellow to see where they went.

Any other fox would have given up getmaking, and other arts relating to home- ting these rabbits; but this old fox was way that was sure to succeed when every-

He looked around until he found two stones. With these he started a fire by striking them together. He then set the arrow-weed on fire in ten places around the outside. Then he ran and jumped over the fire, and climbed over the bush until he was in the center of the patch. He knew that all the animals would stay there just as though they were in a cage, for they were all afraid of fire.

When the fox got to the center of the three times:

The earth will save the fox. The fire will cook his meat: The earth will save the fox. And he'll go happy home.

Carpentry, plumbing, forging, ma- earth opened and he sank out of sight.

As soon as the fire was out, the fox The Hebrew Technical Institute was ered up some of the rabbits and started

I shall get my wife to help me carry the rest home.'

On his way home he met another fox who was looking for something to eat; the pond. and as they were very good friends he offered to divide the rabbits. But, on being told how they were captured, the hungry fox said:

"No, I will try to get some for myself in the same way, if you will teach me the song.

"I shall be very glad to teach you,"

The hungry fox also started off at a brisk gait eager to try this new way of getting food.

He soon found a thick patch of arrow-The following fable, writes Mr. Charles weed where he knew many rabbits lived. credited by the Mohave Indians to one of wise fox, had done. Then he set fire to the arrow-weed in ten places around the outside. He then jumped into the center of the patch as quickly as possible.

But when he looked around and saw Jared's request for an Indian story, and the smoke rising in a thick cloud on all thinking it might be of interest to the sides; and when he heard the crackling of the fire which sounded very much like the popping of guns, be became very much frightened. He thought he would sing his song very quickly and sink down Once there was a very wise old fox who into the ground where he could not see But other duties lie beyond, and we lived with his wife in the thick woods. the smoke nor hear the crackling of the

But, Alas! He could not think of the first word of his song. Then he tried to get out of his trap, but now there was a solid wall of high flames all around him. who have been driven by persecution from last one she had. Then as soon as dinner He kept running around trying to find a way of escape until at last he dropped down choked with smoke and overcome with heat. So this poor fox was burned with the other animals that were in the thicket. Chas. E. Jared.

TOADS.

As several of the classes are making a careful study of toads and frogs, just now, there may be information in the fol-

Toads, like frogs, lay their eggs in the water, but unlike those of the frogs these eggs are laid in long strings or ropes which are nearly always tangled and wound round the water plants or sticks on the bottom of the pond, on the edge of

When the eggs are freshly laid and the water is clear, these egg-ropes look like glass tubes with a string of black beads

This tube is of jelly, like the frog egg-

After a rain, the black mud or sand on the bottom of the pond or stream rises up and sticks to the jelly rope and covers it

Tree toads and salamanders lay their eggs in masses or singly in the water, but not in strings.

In warm weather, the toad-egg hatches out in two or three days.

The eggs should not be placed in the sun, but in a jar of water in a warm place.

You can watch them and see how Just as the fox finished singing, the quickly the eggs change, until the little "pollywogs" and tadpoles hatch out, and chine work, painting, frescoing, brick-lay- All of the arrow-weed thicket burned up swim away like the young ones of the

They live on the tiny plants that grow on the stones and mud at the bottom of popped up out of the ground. He gath- the pond, and every week some of these, with the mud and little stones, should be placed at the bottom of a glass jar or little pool where the little eggs and tadpoles are to be watched, and the jar or tub must be filled with fresh water from

The toad tadpoles are blacker than those of the frog.

those of the frog.

As the tadpole grows larger, the tail grows shorter until at last the legs of the toad appear, the head changes and so does the body; it grows lighter in color and when its tail is nearly gone, it will crawl out on a stick or stone upon the land, and in a little while a very small toad goes hopping off and begins to snap up flies, and the grubs that it lives on kill the green leaves of the plants in our garden.

The toad is truly a friend of man in the

CURRENT COMMENT.

From an esteemed source comes the denial of a yarn affecting an alleged graduate of the Indian School at Carlisle. The narrative for a wonder does not asperse the character of its subject nor reflect upon the government institution which, under Lieutenant Colonel R. H. Pratt's wise guidance for more than two decades, has been engaged in the work of MISS ESTELLE REEL, SUPERINTENDENT leading the Indian from barbarism into the light of civilization. In this respect the story that a son of Sitting Bull, having won distinction in scholarship, the We ourselves have known for many classics and athletics at Carlisle, is at the general run of fables which are contion.

doubtable Sioux chief. Also that Carstatement which credits the bootblack

THE BAND CONCERT APPRECIATED.

That wide-awake and enterprising daily of town-The Evening Volunteer, has this to say of the Band Concert last Saturday night. We don't know as we can agree to the proposition concerning her "Royal Majesty," whom they take to be the Man-on-the-band-stand, for while Conductor Ettinger is A Man-on-the. band-stand when he is there, THE M. O-T. B. S. has but to soar to the pinnacle of the stand, and sit and dream and enjoy the sweet strains, as he observes from a higher point than usual, what is going on. The Volunteer says in part:

Notwithstanding the rather unpropitious condition of the elements, another large audience assembled at the Indian School campus on Saturday evening to hear the second public rehearsal of the Indian Band. Another most meritorious program was rendered with professional finish and precision. Conductor Ettinger is surely the Man-on-the-band-stand now, his marvellous accomplishments with the Band beyond all question entitling him to that appellation. (Her

ANOTHER LETTER FROM OUR INDIAN SOLDIER IN CHINA.

CAMP REILLY, PEKIN, CHINA, March 26, 1901.

COL. R. H. PRATT, CARLISLE, PA.

MY DEAR SIR:

Your letter reached me at last and I was very glad to hear from you again. It seems funny to say Col. Pratt, but I guess it's right. Major Foote of the first battalion has been promoted to Lieutenant Colonel, also.

I understood that Lt. Col. Lee was coming back to the 9th Infantry and that Col. Coolidge was going to the States.

Our company commander is back from the States and looks well. Since he has been in charge again, we have to toe the mark. He is a very good Captain. He is Capt. F. H. Schoeffel. I guess you know our new Colonel Robe. He is a very strict and good disciplinarian.

Last Thursday I was on depot guard, and Col. Robe came down to see if things were going on all right, and that if I liked soldier life, and asked if I were the only Indian in the regiment. I told him I had no complaints to make and that I was getting along fine. He said he was proud of his regiment having an Indian in it.

Car loads of quarter-master supplies are shipped to Tongku every day and we are also about to pack up. Artificers are at work making boxes for the company properties.

The bodies of the dead were dug up, and those that were buried at the legation were brought up Sunday and are now ready for shipment. Two officers are among the dead, Capt. Reilly and Capt. Poddock, of the 6th Cavalry.

I heard we were to leave on the 15th day of April and that the Germans were going to take possession of the temple. Since the foreigners heard that we were going away they make frequent visits, and every day the temple is full of foreign soldiers.

Germans are drilling every morning in the temple. Company B will be left here was named after Mrs. Ruth Shaffner-Et- as legation guard, Major Robinson and Capt. Brewster will stay.

Twelve men from each company will be sent to "B" company. I was picked as one, but my captain won't stand for it, Through private correspondence from so I am going with the regiment to the one of our boys we learn that nearly two Philippines. We will go to Manila, but hundred Sioux Indians have been en- from there we do not know where we will couraged to go to Buffalo, to show them- go to. I don't think we will stay in Manila. I will see some of the boys in Ma-Henry Standing Bear, ex-student, is nila. I have heard from Hugh Leider, one of the interpreters, and it is reported since I have been in China. We have that others of the Carlisle boys and girls just been settled down and now we have have put on Indian clothing in which to leave things just as they are for the

I haven't much time this morning "I myself keeping stay home and work- as I will have to mount guard, so I will have to close. I will write when I reach Manila. With kind regards to all, I remain,

Very Respectfully, ARTHUR BONNICASTLE.

Others Worse off Than we.

George Robinson thinks he has one of the nicest places in the country that a boy could have. "If every pupil had as good a country home and was as well satisfied as I, there would be no trouble," he says. George has been suffering with a painful eye for some time, but it is better now. He speaks of his walking two miles to school last winter and of other hardships he has had, but says he knows they were for his good. "I am of the age now to realize what advantages we have at the Government schools compared with the pupils who go to country public schools, some having to walk long distances for their education and have very poor living at home, while many have no homes at all."

Chemawa School, Oregon, has been passing through a small touch of smallpox, and are to be congratulated on the successful exit of the dreadful malady.

A FAMOUS INDIAN RUNNER.

Deerfoot.

By request we reprint the following from Current Literature.

students are taking training in running it may be interesting to them and to others to read of the greatest Indian runner of the nineteenth century, who surprised full of vigor. the world thirty-seven years ago by his wonderful exhibitions on the race track. Deerfoot is dead and his memory has recently been honored in a fitting way:

A few months ago the body of Deerfoot was removed from the Indian cemetery on the Cattaraugus reserve, New York, and reinterred in the Red Jacket plot, symbol of high ideals and aspirations of Forest Lawn Cemetery, Buffalo. The plot the ancient Iroquois. is owned by the Buffalo Historical So-

beyond a mere mention of the fact.

Deerfoot was born near where he was first buried.

His first appearance of note on a race Indian reserve, which Indians frequent, warpath. especially during county fairs.

The fair of 1856 was notable by reason multitude did not disturb him. of Deerfoot's performance in winning a purse of \$50 by running five miles in twenty-five minutes.

white man, winning a ten-mile race in American people at large? fifty-eight minutes.

This record he subsequently lowered.

unbeaten for over a quarter of a century.

Here are the figures: Eleven miles, 56: 52; eleven and a half miles, ninety-nine yards, in 59:54; twelve miles in 1:2:21/2 seconds. In an hour he covered eleven miles, 970 yards.

The record of Deerfoot's last, to be beaten in 1897, when F. E. Bacon ran eleven miles, 1,243 yards in an hour.

against men and horses throughout the en into a very fast runner. United States.

duced Deerfoot to cross the ocean and defeat the flower of England's profes-

James Putney, the champion long-distance runner of all England, failed to accept a challenge from Deerfoot for a tenmile championship race, so the race was awarded to the Indian without contest.

The Indian ran so well the betting fraternity was non-plussed.

His fame became so great that in November he was specially invited to Cambridge University at the command of the Prince of Wales.

The Prince entertained his guest royal-

Among other tokens of friendship the Prince gave the Indian a watch.

As soon as he did Deerfoot volunteered to run against time. He ran six miles in thirty-three minutes.

A story which has been current for years relates how Deerfoot's financial backers became uneasy owing to the Indian's wonderful successes.

They contrived to influence the betting by taking the runner into confidence and advised him to let his opponent win.

They assured him his prestige would not be tarnished.

replied Deerfoot.

will make money.

Deerfoot simply shook his head in a gentle way and assumed the stoical silence peculiar to his race.

He ran the race and won.

London, England, April 3, 1863.

Amid surroundings of England's beauty and wealth an Indian stepped out to toe As the track season is now on and our the mark clad in attire of a North American red man-a noble physical example of a once nobler race a comparatively just realization of Fenimore Cooper's type of Indian manhood, tall, lithe, sinewy,

WHAT THE COUNTRY PUPILS WRITE.

To my class-mates in the normal room. I hope you are all well and happy just as I am out in the country

I do not milk, you know the cows always kicked my bucket over last summer when I was here.

I do not work much now, wait till the other girl comes and I will work like a farmer man.

I go up town every evening and you girls and boys go but once a month, Poor girls and boys I am sorry for you, but I can not help you at all.

We reached the place in safety and we work every day about the place.

It rained two days and we washed a set of harness and greased it and we finished it today. We are nearly ready for plow-

I will do my very best. I haven't forgot what you said last Saturday night in the chapel.

think here is such a grand place. I like my folks too, they are very kind to

My country mother nursed me when I was sick just as she would her own child. was very thankful to her very much.

There is no time to spare, at least I never go without doing anything. If there

You don't know how glad I am that I came out here. I am so interested in my school work, and think I am doing very well. In all my examinations this month I have had a grade above ninety.

My country parents are so kind and good to me. I am perfectly contented and happy.

I hope this perfect spring weather will continue till we get our spring cleaning done. Our school closes for the day at two o'clock, so it gives me nearly a half day to help.
